Connecting to a Musical Instrument

Connecting to the AUDIO IN jack

Connecting to the USB port

Connecting via Bluetooth

Connecting…

Audio Player
MIDI Player
PDF Score Viewer
Piano Remote Controller

Available functions

Smart devices that display an alert message that USB-MIDI is not supported during app installation cannot connect to the piano.

We advise that the cable recommended by the smart device manufacturer be used.

If you cannot connect successfully, check the following:

- Is the cable connected correctly? (Are you using the correct port?)
- Are you using an Android device that does not support USB-MIDI?
- Are you using an unsupported cable/adapter?

Usage

Available functions

If you want to use built-in songs, check the following:

- Only supported on the PX-S1000/3000.
- Not available on the PX-870/770 or AP-470/270.

The following models feature a user area on the musical instrument itself:

AP-470, AP-270, PX-870, PX-770, CDP-S350, PX-S1000, PX-S3000

The connection port layout differs depending the model used.

For more information on the Bluetooth connection method, refer to the User's Guide for your musical instrument.

Connecting to the AUDIO IN jack
